PROFILE

Software Engineer with commercial experience and a strong track record of independently designing, building and shipping full-stack products from idea through production. Experienced across TypeScript, React, Next.js, Node.js, Python, PostgreSQL and cloud infrastructure, with hands-on work in AI/LLM applications, real-time systems, computer vision and asynchronous architectures. Comfortable owning features end to end, prototyping quickly, debugging production systems and iterating based on performance and product requirements.

EXPERIENCE

Software Engineer · Independent Products — Oct 2025 - Present

- Built and shipped full-stack products across frontend, backend, APIs, authentication, databases and infrastructure, taking features from requirements through testing, deployment and iterative optimisation.
- Developed browser-based computer vision, real-time workflows, AI-enabled features, external API integrations and asynchronous processing using React, TypeScript, Python, Node.js, PostgreSQL, Redis and cloud services.
- Diagnosed authentication, storage, performance and mobile-browser issues, validating releases through automated tests, type checking, linting and real-device testing.

Software Engineer (Junior Full-Stack Developer) · NextPak Agile Solutions — Dec 2023 - May 2024

- Reduced redundant API calls by 30% through RTK Query caching and improved average database response time by 20% by refactoring multi-join Prisma queries.
- Built reusable, strictly typed React and TypeScript components, reducing UI defects by 40% while collaborating in a five-engineer Agile team through sprint planning and code reviews.
- Implemented role-based access control across three user roles, securing sensitive workflows and maintaining data isolation.

Associate Web Developer · Cosmic365 AI — Aug 2022 - Oct 2022

- Resolved data-fetching race conditions responsible for a 30% production bug rate and contributed to schema refactoring that improved query efficiency by 25%.

SELECTED PROJECTS

Bhejo - Remote Document Scanning Platform Live | Repo

Next.js · TypeScript · OpenCV.js · Supabase · Computer Vision · Vercel

- Built and deployed a mobile-first remote scanning platform with on-device document detection, automatic capture, perspective correction, image enhancement, multi-page workflows and browser-based editing.
- Engineered a custom OpenCV.js pipeline with geometric filtering, temporal stability tracking and subpixel corner refinement, while optimising mobile processing, memory lifecycle and capture cadence.

Kinetix - Event-Driven Full-Stack Platform Repo

Next.js · TypeScript · Node.js · Redis · RabbitMQ · WebSockets · Azure · Cloudflare R2

- Designed a modular platform using two-tier Redis caching, cursor-based pagination and real-time WebSocket communication, achieving approximately 1,870 requests/second at 53 ms p99 in benchmark testing.
- Implemented asynchronous RabbitMQ processing for webhook-driven workflows and a provider-agnostic storage abstraction for Azure and Cloudflare R2.

Align - AI Career Intelligence Platform Live | Repo

Next.js · TypeScript · PostgreSQL · BetterAuth · Upstash · LLM Integration · External APIs

- Built and deployed a full-stack career platform combining deterministic scoring with LLM-supported analysis for structured ATS feedback, skills-gap analysis and job-fit recommendations.
- Integrated Adzuna and Reed APIs with authenticated PostgreSQL workflows, protected routes, document generation, rate limiting and caching.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, Tailwind CSS, Responsive UI Development
Backend: Node.js, Java, Python, FastAPI, REST APIs, WebSockets, Microservices
Data & Architecture: PostgreSQL, MongoDB, Redis, RabbitMQ, Event-Driven Architecture, Asynchronous Processing
Testing & Delivery: Playwright, Vitest, API/Integration Testing, Docker, Azure, Vercel, Cloudflare, GitHub Actions, CI/CD, Git
Additional: OpenCV.js, BetterAuth, Supabase Auth, RBAC, Stripe, Webhooks, LLM Integration, RAG, pgvector

EDUCATION

MSc Computer Science & Technology (AI) - Distinction · Ulster University, UK — Sep 2024 - Oct 2025

Relevant study: Machine Learning, Big Data, Knowledge Engineering, Data Science

BSc Software Engineering - First Class Honours, 3.82/4.0 GPA · Capital University of Science & Technology, Pakistan — Sep 2019 - Jul 2023
